

DID YOU KNOW?

White people have the highest risk for skin cancer.

However... Cases of melanoma have been rising in Hispanic people over the last 20 years.

And... Melanoma is more often spotted at a later stage in Black people when it is harder to treat..

**Get to know
the skin you're in!**

**Prevention and early
detection are important for all
skin types.**

UV SAFETY TIPS

**Check the
UV Index DAILY**
